# Cartesian Plane: Plotting Points
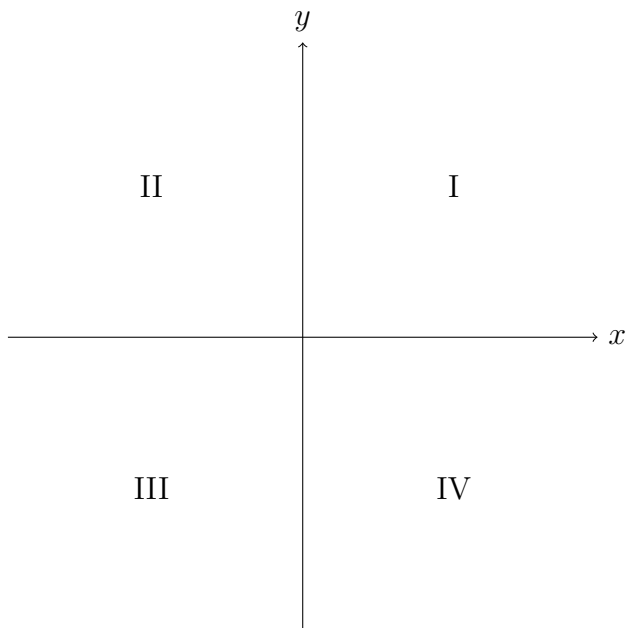

Video companion

1   Introduction

Cartesian plane denoted $\mathbb{R}^2$

2   Axes and quadrants

$$x-\text{axis} = \big\{(x, y) \in \mathbb{R}^2 : y = 0\big\}$$
$$y-\text{axis} = \big\{(x, y) \in \mathbb{R}^2 : x = 0\big\}$$

$$\text{first quadrant} = \big\{(x, y) \in \mathbb{R}^2 : x > 0, y > 0\big\}$$
$$\text{second quadrant} = \big\{(x, y) \in \mathbb{R}^2 : x < 0, y > 0\big\}$$
$$\text{third quadrant} = \big\{(x, y) \in \mathbb{R}^2 : \qquad\qquad \big\}$$
$$\text{fourth quadrant} = \big\{(x, y) \in \mathbb{R}^2 : \qquad\qquad \big\}$$

3 Real-world example

Table of height and weight:

	h (cm)	w (kg)
A	177	88.3
B	164	74.7
